Attention: Stan Guyer

Dear Stan:

I have been contacted by the Illinois Environmental Protection Agency regarding the beginning of leachate sampling and testing from the monitoring wells at the Sand Park landfill site. Since we have still not accepted the site from Browning-Ferris Industries, is this not their responsibility? Certainly the expense is, even if we, as owners, are responsible for the actual processing.

I am interested in pushing on any pressure point available to get Browning-Ferris Industries "in gear." I have included a copy of the letter from Illinois EPA.

Sincerely yours,

B. J.
